Annex no. 1 Indicators Call “Excellent Research”

for submission of grant applications to individual projects in the Operational Programme
Research, Development and Education

Priority Axis: PA1

Investment priority: IP 1

Specific objective: SO 1

| | Code (NCI) | Indicator | Unit of measure | Attribute | Specification to the call |
|--------|------------|--|-----------------|---|---|
| Output | CO 24 | The number of new researchers in the supported entities | FTE | Obligatory for selection, obligatory for fulfilment | A new researcher is defined as a researcher (equivalent of FTE), with whom a contract/agreement was concluded soon after the date of commencement of the project implementation from the Operational Programme Research, Development and Education (For the option A, the earliest start date of the project implementation is the date of publication of the notice in the IS KP14+, for option B, the earliest commencement date of the project implementation is the date of submission of the grant application). |
| | 2 04 02 | The number of new researchers in the supported entities – – women | FTE | Obligatory for selection | A new researcher is defined as a researcher (equivalent of FTE), with whom a contract/agreement was concluded soon after the date of start of the project implementation from the Operational Programme Research, Development and Education (For the option A, the earliest start date of the project implementation is the date of publication of the announcement in the IS KP14+, for option B, the earliest start date of the project implementation is the date of submission of the grant application). |

| | | | | | |
|---------------|---------|---|-------------------------------|---|---|
| Output | CO 25 | The number of researchers who work in the modernised research infrastructures | FTE | Obligatory for selection, obligatory for fulfilment | The number of researchers (expressed as full -time equivalents) working in modernised research centres within the Operational Programme Research, Development and Education project. For the option A, the earliest start date of the project implementation is the date of publication of the announcement in the IS KP14 +, for option B, the earliest date of start of the project implementation is the date of submission of the grant application |
| | 2 05 02 | The number of researchers who work in the modernised research infrastructures – women | FTE | Obligatory for selection | The number of researchers (expressed as full -time equivalents) working in modernised research centres within the Operational Programme Research, Development and Education project. For the option A, the earliest commencement date of the project implementation is the date of publication of the announcement in the IS KP14 +, for option B, the earliest start date of the project implementation is the date of submission of the grant application |
| | 2 40 00 | Number of newly built, extended or modernised research infrastructures and centres of excellence | infrastructure | Obligatory for selection, obligatory for fulfilment | The applicant/beneficiary is required to specify this indicator in the attachment of the grant application of the report on project implementation – – Overview of key outputs for the fulfilment of EFRR key indicators. |
| | 4 66 01 | Extended, refurbished or newly-built capacity without taking agricultural land | m ² of usable area | Obligatory for selection, obligatory for fulfilment Obligatorily tied with 2 40 00 | Environmental indicator |
| Result | 2 03 12 | Number of participations of supported research teams implemented within the international cooperation programmes. | participation | Obligatory for selection, obligatory for fulfilment | The programmes of international cooperation means resources, which the applicant receives in international public tenders, especially in the framework of EU programme for research and innovations, Horizon 2020 (2014 - 2020), including its partial implementation instruments (Joint Technology initiatives, EUROSTARS etc.) and the Research and Training Programme of the European Atomic Energy Community (2014-2018) exclusively from international resources |

| | | | | | |
|----------------|---------|---|--------------|---|--|
| Results | 2 02 14 | The share of scientific publications (selected document types) in co-authorship of domestic and foreign researchers | % | Obligatory for selection, obligatory for fulfilment | |
| | 2 02 11 | Scientific publications (selected types of documents) created by the supported entities | publications | Obligatory for selection, obligatory for fulfilment Compulsory tied with 2 02 14 | |
| | 2 02 16 | Scientific publications (selected type of documents) with a foreign co-authorship created by the supported entities | publications | Obligatory for selection, obligatory for fulfilment Obligatorily tied with 2 02 14 | |
| | 2 20 11 | International Patent Application (PCT) formed by the supported entities | PCT | Optional for selection, obligatory for fulfilment. | |
